

MeyerPro Names Doug Kamm as Chief Executive Officer

Pacific Northwest-based premier AV and broadcast solutions provider enters next chapter with proven leadership and continued growth

Portland, Ore. (Sept. 23, 2025) – [MeyerPro](#), a leading provider of AV and broadcast solutions in the Pacific Northwest, today announced that Doug Kamm has been appointed as the company's new Chief Executive Officer.

Kamm brings decades of experience across the broadcast and live production industries. He served in senior leadership at VER, where he was instrumental in expanding their broadcast services by moving the company beyond dry hire into full service broadcast solutions with flypacks and large scale systems. Most recently, he was with Fuse Technical Group, where he played a key role in driving business growth and building scalable processes that supported the company's success. Doug has also had a long-standing business relationship with MeyerPro, making this a natural next step as he joins to help lead the company forward.

"Doug's combination of industry expertise and operational leadership makes him the right person to guide MeyerPro into its next chapter," said Steve Meyer, President of MeyerPro. "Just as importantly, he recognizes what makes MeyerPro special: our people, our culture, and our commitment to serving clients with excellence. Doug is coming in at a pivotal time to help lead our continued growth while keeping those priorities front and center."

Kamm expressed his excitement about joining MeyerPro:

"What drew me to MeyerPro is the strength of its culture and the people behind it. This team has built an outstanding reputation in the industry by putting clients and colleagues first. I am honored to step into this role and work alongside such a talented group. Together, we will focus on smart, intentional growth while keeping our values at the center of everything we do. I am excited to help lead MeyerPro into its next chapter of expansion and success."

Founded 41 years ago in Portland, Ore., MeyerPro has more than doubled its revenue throughout the last five years and increased its workforce by 150 percent following the

height of the pandemic. Although the live production sector was among the most disrupted during 2020, the company retained all staff through widespread event shutdowns, pivoting with innovative live streaming solutions to support its clients, including Nike and Microsoft. This focus on adaptability and service fueled steady growth while reinforcing MeyerPro's reputation for reliability and excellence.

That commitment to excellence is also reflected in the caliber of its clients. In addition to Nike and Microsoft, MeyerPro's standout partnerships include Boeing, the Doernbecher Freestyle event, Portland Fire, OMSI, OHSU, OSU and the Portland Winter Light Festival. The company has earned recognition both nationally and locally, with notable honors including an Emmy for Outstanding E-Sports Championship Broadcast (2021) and Portland Business Journal Corporate Philanthropy Award (2025), as well as placement on the 2025 Portland Business Journal list of largest family-owned businesses.

Since opening its Seattle office in 2022 and joining the Event Production Network in 2023, MeyerPro has continued to expand while staying true to the vision and leadership that shaped its success. Kamm's proven background in scaling operations and building high-performing teams aligns closely with MeyerPro's momentum. His leadership style emphasizes both business discipline and a people-first culture, ensuring continuity with the values established by company founders and current leaders Steve and Gayle Meyer, who remain deeply engaged in guiding the business.

About MeyerPro
